Update to credit analysis

Summary

Raiffeisenbank Austria d.d. (RBA)'s Baa1 deposit ratings incorporate the bank's baa3 Baseline Credit Assessment (BCA) and two notches of rating uplift from the application of our Advanced Loss Given Failure (LGF) analysis. Our assumption of a high probability of affiliate support from Raiffeisen Bank International AG (RBI, A1/A1 stable, baa3¹) does not result in rating uplift because RBA's BCA is in line with that of its parent.

RBA's baa3 standalone BCA reflects the bank's strong capital buffers, a stable deposit-based funding structure and high liquidity. These strengths are moderated by relatively high asset risks, even though problem loans remain contained. We also expect litigation risk – relating to legacy Swiss-franc-linked loans – to continue to gradually abate.

Exhibit 1
Rating Scorecard - Key financial ratios

These are our Banks Methodology scorecard ratios. Asset Risk and Profitability reflect the weaker of either the latest figure or the three-year and latest figure average. Capital is the latest reported figure. Funding Structure and Liquid Resources reflect the latest fiscal year-end figures.

Source: Moody's Ratings

Credit strengths

- » Strong capital buffers
- » Stable deposit-based funding structure and high liquidity

Credit challenges

» Relatively high asset risk, reflecting high share of unsecured loans, past through-the-cycle cost of risk and some unseasoned loan book risk

Outlook

The stable outlook on RBA's long-term deposit and senior unsecured ratings reflects our expectation that its capital will remain strong, buffering the bank from unexpected losses, liquidity will stay high and its financial performance will remain resilient in light of a benign macroeconomic environment.

It also reflects our expectation that the bank will continue to issue senior unsecured and subordinated debt to maintain a buffer above regulatory requirements, which will sustain our Advanced LGF notching uplift.

Factors that could lead to an upgrade

- » RBA's ratings could be upgraded in case its own BCA or RBI's BCA is upgraded, or because of higher volumes of debt than what we currently expect, which would buffer depositors and senior creditors resulting in lower losses in case of resolution and a higher LGF uplift.
- » RBA's standalone BCA could be upgraded in case of a sustained improvement in its solvency, such as significantly higher ongoing capitalisation and profitability, as well as demonstrated strong asset quality over an entire economic cycle, and further improvements in Croatia's operating environment.

Factors that could lead to a downgrade

- » RBA's ratings could be downgraded in case both its BCA and RBI's BCA were to be downgraded, or from a lower level of senior and subordinated debt as proportion of assets that would reduce the uplift provided from our Advanced LGF analysis.
- » RBA's BCA could be downgraded in case of significant deterioration in its solvency or liquidity, especially in case of a material increase in non-performing loans, a decline in its capitalisation or if its market position and therefore its profitability is eroded, or in case there is a reversal in the improvements in Croatia's operating environment. The BCA could also be downgraded in case material ligation risks re-emerge.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on https://ratings.moodys.com for the most updated credit rating action information and rating history.

Profile

RBA was established in 1994 as the first bank founded with foreign capital in Croatia. RBA provides banking and factoring services to corporates, small and medium-sized enterprises (SMEs), and retail clients. It also offers leasing and consulting services through its subsidiary companies.

RBA was the sixth-largest bank in Croatia in terms of assets with a market share of 8.4% as of June 2025, according to data from the Croatian National Bank (CNB). As of September 2025, RBA had total consolidated assets of €7.9 billion and the bank operated through 67 branches with more than 1,750 employees.

Sources of facts and figures cited in this report

Unless noted otherwise, we have sourced data relating to systemwide trends and market shares from the central bank. Bank specific figures originate from banks' reports and figures are based on our own chart of account and may be adjusted for analytical purposes. Please refer to the document Please refer to the document <u>Financial Statement Adjustments in the Analysis of Financial Institutions</u> published on 8 April 2024.

Although the bank's operational currency was the Croatian kuna until the end of 2022, we have converted all balance sheet and income statement figures into euro at the prevailing rate for each period given the country's accession to the euro area as of 1 January 2023. Therefore, comparisons and relevant growth rates between periods prior to 2023 are influenced by movements in the kuna/euro exchange rate.

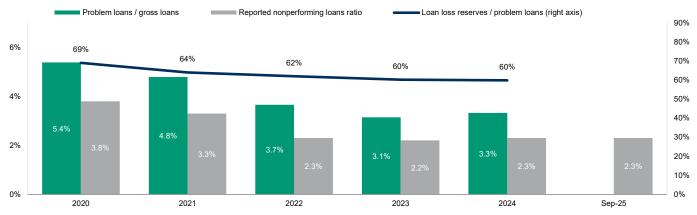

Detailed credit considerations

Problem loans remain contained, but asset risk is somewhat elevated

Our assessment of RBA's asset risk considers its good loan quality in recent years, as well as the relatively high cost of risk in the past and the high share of unsecured personal loans. There is also some unseasoned risk in the bank's portfolio given relatively strong lending growth in the last three years. We expect problem loan formation to remain manageable in the coming quarters because of a favourable macroeconomic environment with robust GDP growth, lower inflation and declining interest rates. Litigation risk from legacy Swiss-franc borrowers has declined², although there is still a risk that losses may be higher than carrying provisions.

The bank's problem loans (defined as IFRS 9 Stage 3 loans and purchased or originated credit impaired loans that are in Stage 3) were 3.3% of gross loans as of the end of 2024 (see Exhibit 3). According to RBI disclosures, RBA reported a nonperforming loan ratio of 2.3% as of September 2025, similarly to year-end 2024.

Exhibit 3
Relatively high asset risk, although problem loan levels have been declining

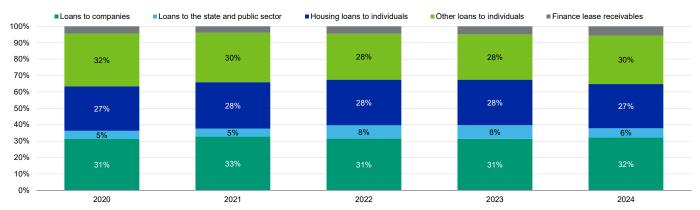

Reported nonperforming loans as disclosed by RBI, which is a different definition from our problem loans. Loan-loss reserves reflect expected credit losses for Stage 3 and purchased or originated credit impaired loans under the IFRS 9 accounting standard.

Sources: Moody's Ratings, RBI results presentations

Meanwhile, the coverage of problem loans by Stage 3 provisions stood at 60% as of the end of 2024. The bank's share of Stage 2 loans (with a significant increase in credit risk) declined to 11%, from 17% in 2023, because of an updated treatment of exposures with increased climate and other risks.

Around 30% of the bank's loans are unsecured loans to individuals³ (see Exhibit 4) which carry higher credit risk as borrowers are more vulnerable to macroeconomic challenges. But recent limits on household lending criteria, including a cap on the debt service to income ratio for consumer and housing loans, will help contain risks going forward. Additionally, a large share of newly granted household loans is at fixed rate, in line with market trends. This lowers borrowers' exposure to interest rate risk and is positive from a credit risk perspective, however it increases the bank's own interest rate exposure, which it hedges using derivatives. Concentration to individual corporate borrowers is moderate.

Exhibit 4
Unsecured loans to individuals make up a significant part of RBA's loan book
Loan book breakdown

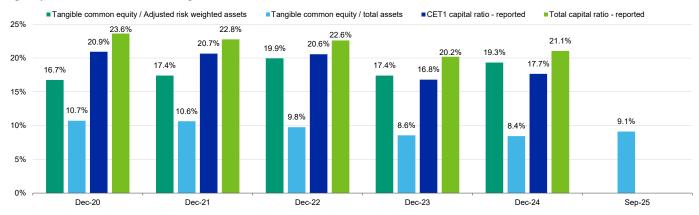

Sources: Moody's Ratings, bank's financial statements

Strong capital buffers

RBA maintains significant capacity to absorb unexpected losses because of its strong capital buffers. Our adjusted tangible common equity (TCE)/risk-weighted assets ratio (RWAs) ratio was 19.3%, and TCE/total assets was 8.4% as of the end of 2024 (see Exhibit 5).

Exhibit 5
High capital buffers are a credit strength

For September 2025 the ratio tangible common equity/total assets reflects equity/total assets Sources: Moody's Ratings, RBI's Q3 2025 results presentation

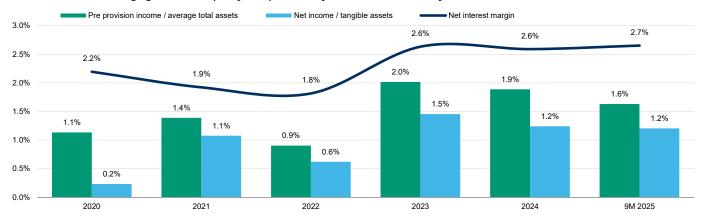

Reported regulatory capital metrics remain significantly higher than capital requirements. The bank reported a Common Equity Tier 1 (CET1) capital ratio of 17.7% and a total capital ratio of 21.1% as of the end of 2024.

These were substantially above the prevailing regulatory requirement of 12.6% for CET1 and 17.0% for total capital ratio, which includes the 2.5% capital conservation risk buffer, a 1.5% systemic risk buffer and a 1.5% countercyclical buffer applicable to all Croatian banks and the bank's 1.5% other systemically important bank buffer. Furthermore, RBA is subject to a 2.0% Pillar 2 capital requirement. The countercyclical buffer will increase to 2.0% in January 2027, but RBA will easily meet the higher requirements.

Moderate ongoing profitability

RBA's ongoing profitability is moderate, with a net income to tangible assets ratio averaging 0.9% during 2020 to 2024. The bank's net income to tangible assets was 1.2% in 2024 during the first nine months of 2025 (see Exhibit 6), continuing to benefit from relatively high interest rates. Going forward, we expect profitability to gradually decline from these higher levels along with lower interest rates, especially on the bank's excess liquidity, but will continue to benefit from relatively contained cost of risk and a focus on operating efficiency.

Exhibit 6
RBA has moderate earnings-generation capacity, but profitability increased substantially since 2023

Sources: Moody's Ratings, RBI's Q3 2025 results presentation

The bank's NIM was 2.6% during 2024 (2023: 2.6%), higher than 1.8% in 2022 because of the higher returns generated by the bank's liquid assets and from a gradual rise in lending rates especially for legal entities. Interest rates on loans to households grew at slower pace because of regulation that limits interest rates.⁴

The bank's profitability has historically been constrained by legal provisions against litigation from consumers who had borrowed in Swiss francs and claim to have suffered losses as a result of the currency depreciation or banks' unilateral change of interest rates. These costs are declining given a gradually lower inflow of new cases. The statute of limitations for lawsuits on the currency clause expired in June 2023. As of September 2025, RBA's accumulated provisions for such court cases amounted to €53 million.

Operating expenses were 2.0% of assets in 2024, higher than larger local peers reflecting more limited economies of scale. However, we expect operating efficiency to improve in light of ongoing digitalisation and automation initiatives by the bank, supporting resiliency at times of stress.

Stable deposit-based funding structure and robust liquidity

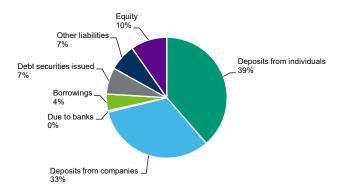

RBA benefits from a broadly stable predominantly deposit-based funding structure. Deposits have grown strongly in recent years and are sufficient to fund the bank's lending operations. The net-loan-to-deposit ratio was broadly stable at 64% as of September 2025 compared to a year earlier, according to RBI disclosures.

Customer deposits made up 72% of total liabilities and shareholders equity as of the end of 2024 (see Exhibit 7). Customer deposits are relatively granular with deposits from individuals making up 54% of total deposits at the end of 2024. Our assessment of RBA's funding structure, however, also considers the substantial share of deposits from companies and some level of confidence-sensitivity in the bank's deposit base overall.⁵

Exhibit 7

RBA is predominantly funded by customer deposits

Funding structure breakdown as of the end of 2024

Sources: Moody's Ratings, bank's financial statements

Reliance on market funding remains limited and we expect it to be stable. Market funds accounted for 12.5% of tangible banking assets as of end 2024. These funds include interbank exposures, parent-bank borrowings, borrowings from developmental institutions and MREL-related senior unsecured debt issuances.

High liquidity buffers also further mitigate funding risks. Liquid assets were 43% of tangible banking assets at the end of 2024. Cash and interbank balances accounted for 24% of assets, while the remaining was invested in securities, mainly government bonds. The bank's consolidated liquidity coverage ratio was a robust 262% as of end 2024, with a net stable funding ratio of 171%. Our assigned liquidity score reflects some modest asset encumbrance and our expectation that liquid assets will decline slightly as the bank expands its operations.

ESG considerations

Raiffeisenbank Austria d.d.'s ESG credit impact score is CIS-2

Exhibit 8

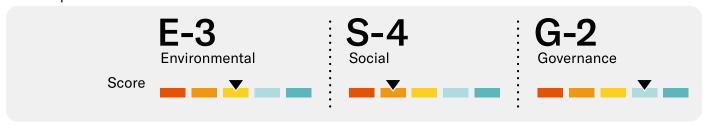

ESG credit impact score

Source: Moody's Ratings

Raiffeisenbank Austria d.d. (RBA)'s CIS-2 indicates that ESG considerations have no material impact on the current ratings.

Exhibit 9
ESG issuer profile scores

Source: Moody's Ratings

Environmental

RBA faces moderate exposure to environmental risks, mainly because of its portfolio exposure to carbon transition risk as a diversified bank with significant corporate exposures. In line with its peers, RBA is facing growing business risks and stakeholder pressure to meet broader carbon transition goals. RBA is engaging in further developing its comprehensive risk management and climate risk reporting frameworks

Social

RBA faces high social risks from customer relations, related to regulatory risk and litigation exposure and is required to meet high compliance standards. RBA, like other Croatian banks, continues to face litigation risk from legacy Swiss franc borrowers, although these risks have significantly abated. There is significant focus on consumer protection in Croatia and banks have to abide by a number of limits and caps, including a maximum interest rate on variable rate loans which is updated twice per year. Croatia's adverse demographics, including net migration outflows is a moderate risk as it may over time affect business opportunities for the bank.

Governance

RBA faces low governance risks, and its risk management framework, policies and procedures are in line with industry practices. The bank also has a track record of prudent financial policies and strategies. Because RBA is effectively controlled by Raiffeisen Bank International through its full ownership, we have aligned the subsidiary's board structure, policies and procedures score with that of its parent, given the bank's strategic importance and public affiliation with the group, the parent's oversight of its subsidiary board and the regulated nature of both entities.

ESG Issuer Profile Scores and Credit Impact Scores for the rated entity/transaction are available on Moodys.com. In order to view the latest scores, please click here to go to the landing page for the entity/transaction on MDC and view the ESG Scores section.

Support and structural considerations

Affiliate support

We believe that there is a high probability of affiliate support from RBI. Our assessment is based on RBI's 100% stake in RBA, the parent's strong operational support and oversight, Croatia's strategic fit in RBI's operations, and the subsidiary's use of the Raiffeisen logo and name. However, this assessment does not translate into rating uplift for RBA's Adjusted because its baa3 standalone BCA is already in line with that of its parent.

Loss Given Failure (LGF) analysis

RBA operates in Croatia and is subject to the EU Bank Recovery and Resolution Directive (BRRD), which we consider an operational resolution regime. We therefore apply our Advanced LGF analysis to RBA's liabilities, which takes into account the risks faced by the different debt and deposit classes across the liability structure should the bank enter resolution.

In our Advanced LGF analysis, we use our standard assumptions. However, we assume junior deposits equivalent to 10% of total deposits because the junior-most deposits, which rank pari passu with senior unsecured debt, in Croatia are those that are excluded from deposit insurance. Excluded deposits are predominantly those from other financial institutions, insurance companies, pension funds and public administrative bodies.

For RBA's Baa1 deposits and senior unsecured debt, our Advanced LGF analysis indicates a very low loss given failure reflecting the loss absorption provided by the substantial volume of deposits and issued senior unsecured debt, as well as subordinated debt, translating into two notches of uplift from the bank's baa3 Adjusted BCA.

Government support considerations

We do not incorporate any government support uplift into RBA's ratings because we consider the probability of government support, in case of need, to be low. Our government support assumptions are driven by the authorities history of preferring market-based solutions for troubled banks and the implementation of the EU's BRRD in Croatia, which limits the authorities' flexibility to provide support.

Methodology and scorecard

About Moody's Bank Scorecard

Our Bank Scorecard is designed to capture, express and explain in summary form our Rating Committee's judgment. When read in conjunction with our research, a fulsome presentation of our judgment is expressed. As a result, the output of our scorecard may materially differ from that suggested by raw data alone (though it has been calibrated to avoid the frequent need for strong divergence). The scorecard output and the individual scores are discussed in rating committees and may be adjusted up or down to reflect conditions specific to each rated entity.

Endnotes

- 1 The ratings shown here are RBI's deposit rating, senior unsecured debt rating and BCA.
- 2 This relates to consumers who had borrowed in Swiss franc-linked loans and are suing the bank claiming to have suffered losses on the basis of exchange rate differences and interest rate changes.
- 3 These include personal loans, credit cards and overdrafts.
- 4 The interest rate on variable rate housing loans may not be higher by more than one-third above the weighted average interest rate on existing housing loans in a particular currency. For non-housing variable rate loans, the interest rate may not be higher by more than one half of the weighted average interest rate of existing consumer loans in a particular currency. For the cap applicable as of 1 January, the average weighted interest rates are calculated based on the data available on 31 October of the previous year, while for the cap applicable as of 1 July they are calculated based on the data available on 30 April of the current year
- 5 Because of RBI's presence in Russia and Ukraine, at the start of the Russia-Ukraine military conflict the bank experienced some deposit outflows from February to March 2022, but liquidity remained robust and deposit growth picked up subsequently. Deposits still grew by 12% in 2022.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it. MCO and all MCO entities that issue ratings under the "Moody's Ratings" brand name ("Moody's Ratings"), also maintain policies and procedures to address the independence of Moody's Ratings' credit ratings and credit rating processes. Information regarding crudian affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service, Inc. and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at ir.moodys.com under the heading "Investor Relations — Corporate Governance — Charter and Governance Documents - Director and Shareholder Affiliation Policy."

Moody's SF Japan K.K., Moody's Local AR Agente de Calificación de Riesgo S.A., Moody's Local BR Agência de Classificação de Risco LTDA, Moody's Local MX S.A. de C.V, I.C.V., Moody's Local PE Clasificadora de Riesgo S.A., and Moody's Local PA Calificadora de Riesgo S.A. (collectively, the "Moody's Non-NRSRO CRAs") are all indirectly wholly-owned credit rating agency subsidiaries of MCO. None of the Moody's Non-NRSRO CRAs is a Nationally Recognized Statistical Rating Organization.

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for India only: Moody's credit ratings, Assessments, other opinions and Materials are not intended to be and shall not be relied upon or used by any users located in India in relation to securities listed or proposed to be listed on Indian stock exchanges.

Additional terms with respect to Second Party Opinions and Net Zero Assessments (as defined in Moody's Ratings Rating Symbols and Definitions): Please note that neither a Second Party Opinion ("SPO") nor a Net Zero Assessment ("NZA") is a "credit rating". The issuance of SPOs and NZAs is not a regulated activity in many jurisdictions, including Singapore. JAPAN: In Japan, development and provision of SPOs and NZAs fall under the category of "Ancillary Businesses", not "Credit Rating Business", and are not subject to the regulations applicable to "Credit Rating Business" under the Financial Instruments and Exchange Act of Japan and its relevant regulation. PRC: Any SPO: (1) does not constitute a PRC Green Bond Assessment as defined under any relevant PRC laws or regulations; (2) cannot be included in any registration statement, offering circular, prospectus or any other documents submitted to the PRC regulatory authorities or otherwise used to satisfy any PRC regulatory disclosure requirement; and (3) cannot be used within the PRC for any regulatory purpose or for any other purpose which is not permitted under relevant PRC laws or regulations. For the purposes of this disclaimer, "PRC" refers to the mainland of the People's Republic of China, excluding Hong Kong, Macau and Taiwan.
