The Bank shall not be accountable for being unable to place, modify or revoke Requests by electronic means due to malfunction of telecommunication devices, malfunction of telecommunication lines or any other event beyond control of the Bank. The Bank shall not be accountable for any damage or loss arising from the theft of the Client's identity during message transmission. The client is aware that the Bank uses systems for protection and system verification of all messages and that delivery of messages may consequently be rejected or delayed.
3. **Foreign exchange risk:** Foreign Exchange Risk (Currency Risk) can occur when the liability under Agreement is calculated by applying the exchange rate for euro (hereinafter: euro or EUR) in relation to the foreign currency. The foreign currency may appreciate or depreciate in future in comparison to its present value in relation to EUR. The exposure to the currency risk may result in losses or gains due to the change of inter-currency relations of individual currencies. The Bank has no obligation to notify the Client and/or the counterparty of any change of the CNB exchange rate policy. Exchange rates, such as the price of EUR versus the U.S. dollar (USD) or Swiss franc CHF, are formed indirectly and it is the market fluctuations in international foreign exchange markets too that have a crucial impact on the currency risk, as quotations for international convertible currencies or convertible currency pairs, such as the euro versus the U.S. dollar (EUR/USD) or the Swiss franc versus the euro (EUR/CHF), are exclusively governed by global supply and demand without the CNB's influence.
4. **Variable interest rate risk:** Prior to entering into the Agreement the Bank had provided to the Client information, clarifications and warnings that variable-rate credit facilities expose the Client to the risk of interest rate changes. The probability of interest rate change increases the longer the loan repayment period is. The risk of change of agreed interest rates results from variable parameters in interest rate formation. A variable parameter may shift upward and downward resulting in a change of the interest rate. Reference rate is a parameter achieved in a particular money market for a particular currency in a defined period (for instance, EURIBOR, LIBOR, or other). As a consequence of market trend movements, changes can occur in the ratios of supply and demand for cash in a particular financial market. The money supply and demand may also be affected by changes of monetary and fiscal policies, changes in the liquidity of financial market participants and their expectations, investors' perception of risk, as well as disturbances in the international financial market. Changes of reference rates result from movements in the money supply and demand in the reference market, as well as from changes of expectations. Measures imposed by the CNB have no impact on fluctuations of reference rates in the international markets (for instance, Euribor, Libor, or others).

20. Taxes and other duties: The Client shall make payments of the principal, interest, fees and expenses, without retention or deduction of any existing or future taxes, tax advances or any duties. If such retention or deduction is required to be made by law, the Client shall pay to the Bank such additional amounts as are necessary so that the Bank can receive the full amount of principal, interest, fees and expenses that it would have received if no such retention or deduction had been made.

21. Legal dispute, jurisdiction: Any dispute shall be submitted for resolution to the Court of Zagreb. The Agreement is governed by Croatian law with the exception of the conflict of law provisions.

22. Loans: Under a loan agreement the Bank undertakes to make available to the Client a certain sum of money in accordance with the agreed upon terms and conditions, and the Client undertakes to make payments of agreed upon interest and fees and to repay the drawn amounts as and when due and to perform other obligations in accordance with the Agreement.

23. Loan drawdown

1. The loan shall be drawn upon fulfillment of conditions precedent set forth in the Agreement within 30 days as of the Agreement date, in accordance with the lending capacity of the Bank, unless otherwise stipulated in the Agreement.
2. Loan shall be drawn in the currency in which it is approved.
3. Loan shall be utilized in one lump sum by being disbursed to the Client's account maintained with the Bank, unless otherwise stipulated in the Agreement.
4. Failure by the Client to draw the loan in whole or in part during the drawdown period shall be construed as waiver by the Client to draw the loan in whole or part of the loan.
5. During the availability/draw period of the revolving loan, upon repayment of an individual tranche the Client shall have the right to redraw the tranche provided that the total balance of outstanding unpaid tranches shall not exceed the principal balance of the revolving loan from which tranches are drawn and that there are no overdue amounts payable in respect of the tranche/-s drawn.

24. Drawdown for authorized overdraft of transaction account

1. The loan-authorized overdraft of transaction account shall be drawn as of the Agreement date, however not before all conditions precedent under the Agreement have been fulfilled, in accordance with the lending capacity of the Bank, and no later than the day which precedes the repayment due date.
2. Drawdown end date for authorized overdraft shall be any day which precedes the loan repayment due date of the authorized overdraft as set out in the Agreement.
3. If the due date stated in the Agreement is not a business day, then the due date shall be the immediately following business day.
4. The available loan balance to be drawn is stated in the Transaction Account Statement.
5. During the drawdown/utilization period the Bank is authorized, at its discretion, to reject the drawdown of such loan, when the Bank receives an order from the Financial Agency (FINA), in keeping with the provisions of the Act on the implementation of the enforcement of monetary assets, submitted on the basis of a payment request document requiring the Bank to execute seizure against financial assets in the Borrower's account, to execute payments to the debit of the respective account, to implement a measure to collect against a credit balance in the account, to execute attachment or blockade of the account, or to undertake any other action for the purpose of executing a payment request document in accordance with data stated in FINA's order.

 - D. RIR may no longer be used; or

which have been offered to the Bank by three leading commercial banks active in the reference interbank market;

D. If the Alternative interest rate cannot be determined by applying any of the methods described in items A, B and C, then the Bank shall use as the Alternative reference rate the rate at which the Bank usually obtains funding.

Alternative reference rate shall preserve the economics of the transaction financed in accordance with these General Terms or under the Agreement, and take into account the then prevailing market practice, and, for the avoidance of doubt, it may provide for the use of a replacement benchmark and include the margin adjustment to reduce or eliminate, to the extent reasonably practicable, any transfer of economic value from one contracting party to another as a result of the application of such replacement benchmark.
