

Instructions for installing the RBA SignErgy application 3.21.003

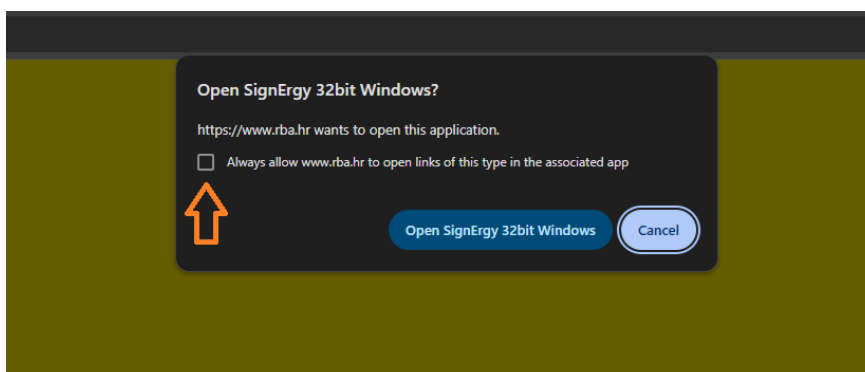

Steps:

1. **Uninstallation** - Select **Start/Settings/Applications** - then find the RBA SignErgy application in the list of apps and uninstall the existing RBA SignErgy application. After uninstallation, please restart the computer.
2. **Installation** - download the new version of the RBA SignErgy application **3.21.003**, and start the installation. The new version of the application is available for download on the mojaRBA login page, as well on the bank's website under the software support for FINA Certificates. After installation, please restart the computer.
